

Security

File: application/database.php

Issue type: Responsibility issue

Oplossing: Revoke and change this password, as it is compromised.

Betrouwbaarheid

File: application/index.php

Issue type: Intentionality

Oplossing: Add "lang" and/or "xml:lang" attributes to this "<html>" element

File: application/index.php

Issue type: Consistency issue

Oplossing: Replace "include" with "include_once"

File: application/move.php

Issue type: Consistency issue

Oplossing: Replace "include" with "include_once"

File: application/pass.php

Issue type: Consistency issue

Oplossing: Replace "include" with "include_once"

File: application/ play.php

Issue type: Consistency issue

Oplossing: Replace "include" with "include_once"

File: application/ undo.php

Issue type: Consistency issue

Oplossing: Replace "include" with "include_once"

Onderhoudbaarheid

File: application/database.php

Issue type: Consistency issue

Solution: Add a new line at the end of this file.

File: application/database.php

Issue type: Consistency issue

Solution: Rename function "get_state" to match the regular expression `^[a-z][a-zA-Z0-9]*$`.

File: application/database.php

Issue type: Consistency issue

Solution: Rename function "set_state" to match the regular expression `^[a-z][a-zA-Z0-9]*$`.

File: application/database.php

Issue type: Consistency issue

Solution: Remove this closing tag `"?>"`.

File: application/index.php

Issue type: Adaptability issue

Solution: Replace "include_once" with namespace import mechanism through the "use" keyword.

File: application/index.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/index.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/index.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/index.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/index.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/index.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/index.php

Issue type: Intentionality issue

Solution: Remove the parentheses from this "echo" call.

File: application/index.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/index.php

Issue type: Consistency issue

Solution: This statement will not be executed conditionally; only the first statement of this 2-statement block will be. The rest will execute unconditionally.

File: application/index.php

Issue type: Adaptability issue

Solution: Replace "include" with namespace import mechanism through the "use" keyword.

File: application/move.php

Issue type: Consistency issue

Solution: Add a new line at the end of this file.

File: application/move.php

Issue type: Adaptability issue

Solution: Replace "include_once" with namespace import mechanism through the "use" keyword.

File: application/move.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/move.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/move.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/move.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/move.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/move.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).

File: application/move.php
Issue type: Intentionality issue
Solution: Add curly braces around the nested statement(s).

File: application/move.php
Issue type: Intentionality issue
Solution: Add curly braces around the nested statement(s).

File: application/move.php
Issue type: Intentionality issue
Solution: Add curly braces around the nested statement(s).

File: application/move.php
Issue type: Intentionality issue
Solution: Add curly braces around the nested statement(s).

File: application/move.php
Issue type: Intentionality issue
Solution: Add curly braces around the nested statement(s).

File: application/move.php
Issue type: Adaptability issue
Solution: Replace "include" with namespace import mechanism through the "use" keyword.

File: application/move.php
Issue type: Consistency issue
Solution: Split this [Character Count] characters long line (which is greater than 120 authorized).

File: application/move.php
Issue type: Consistency issue
Solution: Remove this closing tag ">".

File: application/pass.php
Issue type: Consistency issue
Solution: Add a new line at the end of this file.

File: application/pass.php
Issue type: Adaptability issue
Solution: Replace "include" with namespace import mechanism through the "use" keyword.

File: [Filename Not Specified]
Issue type: Consistency issue
Solution: Split this [Character Count] characters long line (which is greater than 120 authorized).

File: [Filename Not Specified]

Issue type: Consistency issue
Solution: Remove this closing tag ">".

File: application/play.php
Issue type: Consistency issue
Solution: Add a new line at the end of this file.

File: application/play.php
Issue type: Adaptability issue
Solution: Replace "include_once" with namespace import mechanism through the "use" keyword.

File: application/play.php
Issue type: Intentionality issue
Solution: Add curly braces around the nested statement(s).

File: application/play.php
Issue type: Intentionality issue
Solution: Add curly braces around the nested statement(s).

File: application/play.php
Issue type: Intentionality issue
Solution: Add curly braces around the nested statement(s).

File: application/play.php
Issue type: Intentionality issue
Solution: Add curly braces around the nested statement(s).

File: application/play.php
Issue type: Adaptability issue
Solution: Replace "include" with namespace import mechanism through the "use" keyword.

File: application/play.php
Issue type: Consistency issue
Solution: Split this [Character Count] characters long line (which is greater than 120 authorized).

File: application/play.php
Issue type: Consistency issue
Solution: Remove this closing tag ">".

File: application/restart.php
Issue type: Consistency issue
Solution: Add a new line at the end of this file.

File: application/restart.php
Issue type: Consistency issue

Solution: Split this [Character Count] characters long line (which is greater than 120 authorized).

File: application/restart.php

Issue type: Adaptability issue

Solution: Replace "include_once" with namespace import mechanism through the "use" keyword.

File: application/restart.php

Issue type: Consistency issue

Solution: Remove this closing tag ">".

File: application/util.php

Issue type: Consistency issue

Solution: Add a new line at the end of this file.

File: application/util.php

Issue type: Intentionality issue

Solution: This function has 4 returns, which is more than the 3 allowed.

File: application/util.php

Issue type: Intentionality issue

Solution: Add curly braces around the nested statement(s).
